

Thank You for Your Input: Refreshing the Code of Ethics

The College's Code of Ethics outlines ethical duties and responsibilities of Registered Massage Therapists as regulated healthcare professionals. We're seeking your input in the process of refreshing the Code of Ethics to best support Massage Therapists in Ontario in ethical decision-making within clinical practice.

We thank those who completed our initial survey, which closed on March 24th. This high-level survey was only the first stage and first engagement opportunity in a longer term, larger project. Findings from this survey will help inform the drafting of the updated Code of Ethics. CMTO is also looking into other examples of Codes of Ethics and best practices in this area. Later this year, the College will ask you to provide comments and feedback on its initial draft of the refreshed Code of Ethics.

Thanks for taking the time to provide your insight into this important initiative!
