

Standard of Practice: Infection Prevention and Control Draft for Consultation

For definitions of bolded terms, please [review the Glossary](#).

Last revised: Date

Implementation: Date

Registered Massage Therapist Outcome

The Registered Massage Therapist (RMT) follows safe **Infection Prevention and Control (IPAC)** procedures to protect the health and safety of **clients**, themselves and others in the practice environment.

Client Outcome

The client is not put at significant risk for transmission of communicable disease.

Requirements

The RMT must:

1. Adhere to current IPAC government orders and directives, legislation, CMTO guidelines and employer/practice setting policies.¹
2. Remain informed of current infectious disease risks, symptoms, routes of transmission and prevention strategies in their community and/or practice setting.
3. Implement an IPAC plan tailored to the practice setting.
4. Maintain the practice premises in a sanitary manner.
5. Follow Public Health Ontario (PHO) recommendations for cleaning and disinfecting the practice setting, at a minimum including:
 - a. Cleaning and disinfecting massage tables, face cradles and other surfaces frequently touched by the client and/or RMT before each client.
 - b. Using cleaned and disinfected linens and covers for each client (including but not limited to sheets, pillow covers, blankets, face cradle covers).
 - c. Handling soiled linens safely.

¹ In the case of differences between varying requirements, RMTs must adhere to the most restrictive or stringent requirements.
Standard of Practice: Infection Prevention and Control – Draft for Consultation
October 2020

- d. Cleaning and disinfecting any equipment and supplies used in treatment after each client (for example, hot stones, ultrasound equipment, myofascial cups or assessment/treatment tools).
- e. For **acupuncture**:
 - i. Ensuring needles are sterile prior to use;
 - ii. Storing and disposing of used needles safely;
 - iii. Documenting and implementing needlestick injury protocols; and
 - iv. Vigilance in maintaining high standards of cleanliness, skin disinfection technique, needling technique and careful anatomical considerations
6. Apply additional IPAC practices when indicated by **risk assessment** or by government or CMTO, such as using **personal protective equipment (PPE)** (for example, gloves, masks, gowns, face shields).
7. Postpone or modify treatment if appropriate IPAC measures cannot be implemented or required PPE is not available.
8. Provide information to clients about infectious disease risk, IPAC and PPE when appropriate.
9. Document and notify clients of any incidents where IPAC practices could not be maintained and/or a client was exposed to significant risk of infectious disease transmission.

The RMT must apply IPAC **routine practices** regularly, including:

10. Conduct risk assessments of the practice environment and all equipment/supplies used in treatment.
11. Conduct risk assessments for infection transmission.
12. Conduct risk assessment of intended or likely interactions between RMT and client (for example, treatment approach and modalities, areas of body being treated, length of treatment).
13. Hand hygiene:
 - a. Wash hands and arms to above the elbow with soap and water at the following key moments;
 - i. at entry to practice setting and before leaving;
 - ii. prior to and after each client or client environment contact;
 - iii. after removing soiled linens and prior to handling clean linens;
 - iv. putting on or taking off PPE;
 - v. before and after eating and/or drinking;
 - vi. after using the bathroom/washroom; and
 - vii. when hands are otherwise soiled.
 - b. Cover their own broken skin or open wounds with a protective barrier (for example, finger cot, gloves).
 - c. Maintain fingernails at an appropriate length to allow for effective hand hygiene.
 - d. Remove jewelry that may impede effective hand hygiene.
