

2021 STRiVE Update

STRiVE – the Quality Assurance Program had over 87% of Registered Massage Therapists (RMTs/MTs) successfully complete identified components between September and November 30, 2021. Thank you to all RMTs who fulfilled annual professional obligations on time.

STRiVE will continue to expand in the coming years, with the introduction of additional components to support professional development.

Recognizing that professional development and continuing education can occur at any time during the year, the STRiVE platform remains open to record professional achievements and learning activity updates. [Learn more about STRiVE.](#)
