

Sandra Cina – Candidate Statement

I've been a registered and practicing RMT since January 2016 after graduating from Sutherland Chan. In February 2018 I took over ownership of a small, thriving clinic in Toronto. I am applying for the District 9 Board position and would be honoured to take part in helping to shape and promote the values of our profession for the public.

For the past 7 years, I've had the pleasure of serving as a non-Board member on the ICRC (5 years) and QAC (2 years) during which time I've refined the skills needed to perform these roles well. I have confidence in my professional judgement, listening and decision-making skills. Practical application in the manner required of these committees has allowed me to further develop my skills and garner new ways to expand my viewpoints and knowledge in these areas. I have a greater understanding of how to apply these skills in an ethical way with the integrity deserved by the College and its registrants.

I believe passionately in the profession and its place in the healthcare system. While I've always respected and valued the objectives of the College, participating as a committee member has solidified my belief of the need for a cohesive voice across membership that is rooted in the values and principles of the CMTO. All RMTs must be held to the same unwavering standard in order to protect the public and the public must feel the College's support to help empower them to voice concerns when needed and play a vital, active role in their own healthcare.

A profession is only as strong as its members. I want RMTs to be held to the highest standard of conduct, care and capacity so we can continue to thrive and help the public in the ways that only we can.
